

SPECTRAMAX® QUICKDROP™ Micro-Volume Spectrophotometer

Quantitate micro and large volume samples in one platform using the 0.5 µL sample port or the cuvette port.

One-swipe cleaning streamlines your workflow and allows you to quickly move from sample to sample.

Easy-to-use touch-screen interface allows you to easily set up your experiments or use pre-configured analysis

Export data to your computer for additional analysis using a USB Flash Drive. No dedicated computer

KEY FEATURES:

- Touch-screen interface with pre-configured analysis methods.
- Fixed path length requires no calibration.
- Micro-volume sample port has no moving parts to break or skew results regardless of viscosity.
- One-swipe cleaning.
- Easily export data to a USB drive for additional analysis.
