Kategori

- Preparation / Extraction
- PCR Detection

1. Preparation / Extraction

(Deskripsi tahap preparasi/ekstraksi)

NucleoSpin Gel and PCR Clean-up XS

Cat. No: 740611.250

Concentrated clean up with small elution volumes from PCR reaction mixtures and agarose gels

- Application PCR clean up and gel extraction, Sample concentration
- Format 96-well plate
- Package unit 192 Prep(s), 384 Prep(s), 2304 Prep(s)

Rapid Extract PCR Kit/Lysis Kit

Cat. No: LK0890707

Type of Nucleic Acid Purification:

- PCR Clean-Up & Gel Extraction Kit
- Plasmid DNA Purification System
- Genomic DNA Purification System
- RNA Purification System
- Virus Nucleic Acid Purification

Genesig Easy DNA/RNA Extraction Kit

Cat. No: genesigEASY-EK

Product features:

- Extracts DNA and RNA with high yields in 45-60 mins
- Works with huge range of sample types
- Safe protocol with no phenolic chemicals
- No centrifuge required - for use in the lab or in the field

2. PCR Detection

(Deskripsi tahap PCR Detection)

PCR Biosystems

Cat. No: PCR Biosystems

The UK-based PCR experts, have expanded their range of specialist molecular biology kits. Our PCR experts are on hand to support researchers, developers and manufacturers.

Available applications for:
Covid-19, qPCR, PCR, NGS, cDNA Synthesis.

Vela Diagnostics

Cat. No: Vela Diagnostics

Vela Diagnostics offers a broad range of tests for the diagnosis of infectious diseases and cancer.

Available applications for:
Bloodborne Viruses, Gastroenteritis, Microbiology, Immunosuppression, Leukemia, Respiratory Infections, Sars CoV-19, STD.

Genesig

Cat. No: Genesig

As part of Primerdesign, genesig presents a range of qPCR detection kits. The range includes kits for:

Human pathogen detection, Veterinary diseases, Food & water analysis, GMO detection, Species identification, Bio-threat detection, and many more.
